In the spring garden, the first sign of the changing season comes from the glossy green shoots of bulbs. Before I know it, I find them sprouting here and there— and stepping into the garden becomes something I look forward to. They bloom faithfully each year, one after another, and I can’t help but wonder if there might be a tiny clock hidden inside each bulb.

When I first started growing roses, I chose soft tones—pale pinks and apricots. But as my garden filled with greenery, deep pink roses began to shine beautifully. I’ve paired them with small flowers to complement the roses.

The berries in the garden are often used for decoration rather than eating. Even a small cluster in a glass makes a lovely display. I once made jam with frozen wild strawberries—the slightly bitter ones had a richer flavor, with a hint of raspberry fragrance.

COSMO

“COSMO Embroidery Thread,” renowned for its high-quality Japanese craftsmanship, is a historic brand handled by Lecien Corporation since 1950. With its rich variety of colors, silk-like luster, and smooth stitching experience, it has been loved for many years by artists and embroidery enthusiasts both in Japan and around the world.

Because it is made from 100% natural cotton—a material whose quality can be easily affected by environmental conditions—great care is taken starting from the raw cotton before it becomes thread. COSMO uses its own optimal blending ratio to ensure the finest quality. Through skilled dyeing techniques, the threads are finished in delicate, beautiful colors that resist fading and color loss.

By actually holding it in your hands, you can more deeply experience its delicate beauty and smooth, comfortable feel.
